

Material Information Sheet – Foamed PVC

Description

Foamed PVC (F-PVC) is a versatile plastic material used to make light, rigid signs where moderate levels of performance are acceptable. The material is easy to shape, cut and bond; post-painting or similar treatments can be carried out where necessary with appropriate preparation.

Its main characteristics are as follows:-

- Versatile Light rigid material
- Good machine-ability, easy to print or post-finish
- Good chemical resistance
- Excellent fire resistance

Applications in Sign-making

F-PVC can be used to produce signage where a mid -term lifespan is desirable.

With appropriate preparation F-PVC can be printed using a variety of techniques (such as wide-format digital printing, screen printing etc.).

Availability

F-PVC is commonly supplied in sheet form in thicknesses from 1mm through 19mm. F-PVC is available in a range of colours:-

- White
- Black
- Gray
- Red
- Blue
- Yellow
- Green
